<https://www.thecattlesite.com/breeds/dairy/19/ayrshire>

Cattle

<Species/Breed>

Ayrshire Cattle

<Life Span>

15-20 yrs

<Native Region/Common Region>

Originated from Scotland

Russia, North America, Britain, Australia, New Zealand, Africa and parts of Europe and South America.

<Population Size> (Where applicable)

n/a

<Typical Behavior>

A herbivore cattle breed that are mostly white and red. The males (bulls) tend to have darker reds which sometimes look back in contrast to the white. They tend to be docile in nature.

---

<Animal Type> <https://www.breedslist.com/brown-swiss-cattle.htm>

Cattle

<Species/Breed>

Brown-Swiss Cattle

<Life Span>

10 - 15 yrs

<Native Region/Common Region>

Originates in the United States of America

<Population Size> (Where applicable)

n/a

<Typical Behavior>

Docile and Friendly, this breed of cattle is mainly light brown with darker shades across its body. Herbivores that eat mainly greens, grains and silage.

<https://www.thecattlesite.com/breeds/dairy/22/holstein>

Cattle

<Species/Breed>

Holstein Friesian Cattle

<Life Span>

20 yrs

<Native Region/Common Region>

Originated in Europe

<Population Size> (Where applicable)

n/a

<Typical Behavior>

Black and white dairy cows, typically not very good at handling heat.

---

<Animal Type>

<https://breeds.okstate.edu/cattle/jersey-cattle.html>

<https://www.britannica.com/animal/Jersey-breed-of-cattle>

Cattle

<Species/Breed>

Jersey Cattle

<Life Span>

15-20 yrs

<Native Region/Common Region>

Originated in Europe, in British territory.

<Population Size> (Where applicable)

n/a

<Typical Behavior>

Light brown breed of cattle that look similar to the Brown-Swiss. Very heat tolerant and adaptive. Also known for their grazing.

---

<Animal Type>

<https://www.webmd.com/pets/dogs/what-to-know-great-danes>

Cattle

<Species/Breed>

Red Dane Cattle

<Life Span>

10 yrs

<Native Region/Common Region>

Originates in Europe, from Denmark

<Population Size> (Where applicable)

n/a

<Typical Behavior>

The Great Dane personality is quite friendly. They also have a moderate trainability level, which makes them good pets. Since they have high energy levels, they're fun to have around kids.

---

Bird (Special):

Bear (Special):

Snake:

<Animal Type>

Snake

<Species/Breed>

<Life Span>

About 30 yrs

<Native Region/Common Region>

Worldwide

Habitat is species dependent

<Population Size> (Where applicable)

Species dependent

<Typical Behavior>

Butterfly:<https://a-z-animals.com/animals/butterfly/>  
<https://ansp.org/exhibits/online-exhibits/butterflies/lifecycle/#:~:text=Most%20adult%20butterflies%20live%20only.and%20may%20live%20several%20months.>

<Animal Type>

Butterfly

<Species/Breed>

17,500 species.

<Life Span>

Around 1 to 2 weeks (not including pre-chrysalids), however some can hibernate in the winter giving them up to an extra month

<Native Region/Common Region>

Worldwide

Quiet Forest and fields. Also most places that are abundant with flowers.

<Population Size> (Where applicable)

n/a

<Typical Behavior>

They eat nectar, pollen and honey. Butterflies originate as caterpillars and go through metamorphosis to emerge as butterflies.

Crab:<https://a-z-animals.com/animals/crab/>

<Animal Type>

Crab

<Species/Breed>

Snow Crab, Portunidae, Jonah Crab, Spider Crab, Raninidae, etc

<Life Span>

1 - 100 yrs

<Native Region/Common Region>

Worldwide

Coral reefs and coastlines

<Population Size> (Where applicable)

unavailable

<Typical Behavior>

Crabs are carnivorous creatures preying on smaller fish, shrimp and mussels.

The specific behavior of the creature depends on its species. Some crabs are very isolated creatures that only meet when it is time to mate, while others group together in clusters called "cast".

Camel:<https://a-z-animals.com/animals/camel/>

<Animal Type>

Camel

<Species/Breed>

Bactrian Camel, Dromedary/Arabian Camel and Wild Bactrian Camel

<Life Span>

40 - 50yrs

<Native Region/Common Region>

Africa, Asia, Eurasia, Australia

Arid environments like deserts and scrubland

<Population Size> (Where applicable)

20 Mil

<Typical Behavior>

Herbivores that like thorny and salty plants with other grasses and grain. Their main predators are Lions, Leopards and Humans.

They travel the dry lands in herds of about 40 individuals. Usually made up of mostly females and their young with a single male leading

Crocodile:<https://a-z-animals.com/animals/crocodile/>

<Animal Type>

Crocodile

<Species/Breed>

Saltwater crocodile, Nile crocodile, American crocodile, Freshwater crocodile, New Guinea crocodile, etc.

<Life Span>

20 - 70 yrs

<Native Region/Common Region>

Africa, North, Central and South America, Oceania, Asia

Mostly in Temperate to Tropical zones.

Rivers, Lakes, marshes, lagoons, mangrove swamps and estuaries

<Population Size> (Where applicable)

Species Dependent

<Typical Behavior>

As Carnivores that prey on smaller fish, crustaceans, deer and others of the like. Crocodiles are social among their peers having hierarchies and group feeding behavior.

Like most reptiles they are unable to regulate their body temperature themselves and instead rely on their environment (mostly sun).

They make hissing sounds to threaten other creatures.

Caterpillar: <https://a-z-animals.com/animals/caterpillar/>

<Animal Type>

Caterpillar

<Species/Breed>

n/a

<Life Span>

Metamorphosis takes about 1 - 11 months

<Native Region/Common Region>

Worldwide

<Population Size> (Where applicable)

Over 1000 species

<Typical Behavior>

Herbivores, though a few species of caterpillar can eat insects and other caterpillars. Some caterpillars that turn into moths can sting but the ones that turn into butterflies usually don't.

Tiger: <https://a-z-animals.com/animals/tiger/>

<Animal Type>

Tiger

<Species/Breed>

n/a

<Life Span>

18 - 25 yrs

<Native Region/Common Region>

Asia, Eurasia

<Population Size> (Where applicable)

Approximately 4500

<Typical Behavior>

Tigers have very few predators, their speed, sharp claws and teeth make for a good defense and a better deterrent. Though they can still be outsmarted by creatures like humans and outsized by creatures like elephants and large buffaloes. They are Carnivores that eat Deer, Cattle, Wild Boars and the like.

They are great swimmers and enjoy water.

Cheetah: <https://a-z-animals.com/animals/cheetah/>

<Animal Type>

Cheetah

<Species/Breed>

n/a

<Life Span>

10 -12 yrs

<Native Region/Common Region>

Africa, Asa  
Grasslands, semi-desert prairies, Mountainous Terrain  
<Population Size> (Where applicable)  
Approximate 8,500  
<Typical Behavior>  
The cheetah is a carnivorous animal whose diet contains Gazelle, Wildebeest, Hare, etc.

Unlike other African felines, cheetahs are primarily daytime creatures. This allows them to avoid competition from other felines or hyenas. They use stealth as their main weapon for hunting prey and in spite of their shy nature they are fiercely territorial.

Lion: <https://a-z-animals.com/animals/lion/>

<Animal Type>  
Lion  
<Species/Breed>  
N/A  
<Life Span>  
8 - 15 yrs  
<Native Region/Common Region>  
Asia, sub-Saharan Africa  
Open woodlands, Scrub, Grassland  
<Population Size> (Where applicable)  
Approximate 23k  
<Typical Behavior>  
They are Carnivores who eat a diet consisting of buffalo, zebra, gazelles, even giraffes if they can manage to. Unlike other felines, lions hunt in groups. Specifically, the Lionesses will work together to chase and take down prey.  
  
Male lions patrol territories of around 100 square meters. They don't hunt but instead are in charge of defending their territory

Zebra: <https://a-z-animals.com/animals/zebra/>

<Animal Type>  
Zebra  
<Species/Breed>  
There are Three Species of Zebras:  
(Mountain Zebra) Equus zebra,  
(Plains Zebra) Equus quagga,  
(Grevy's Zebra) Equus grevyi  
<Life Span>  
20 - 30 yrs

<Native Region/Common Region>

East & South Africa.

Open grassland, plains, savannah woodlands

<Population Size> (Where applicable)

150k - 250k (Endangered)

<Typical Behavior>

Herbivores who's natural predators are Lions, Hyenas, Wild Dogs and Cheetah.

Highly sociable, roam in herds. Grevy's Zebras tend to have large territories of up to 10 square kilometers. The Plains and Mountain Zebras tend to stay in their native regions in long-term herds that split into smaller family herds
